**United States Power Squadrons® Courses Offered in 2015/2016  
By the Consortium of Coastal Squadrons**

9/19/2015

**Safe Boating — America’s Boating Course**

America’s Boating Course emphasizes boating safety. Topics covered include: life jackets; fire extinguishers; distress signals; boat operator responsibilities; boating regulations; fueling; boating courtesy; basic rules of navigation; buoys; sound signals; navigation lights, shapes and sounds; boat registration; and environmental considerations. Additional material on waterskiing/tubing as required by Emily’s Law is included.

This course exposes the tip of the iceberg of boating knowledge, creating an awareness of the know-how needed to skipper a boat safely and earning the successful student the credentials needed to qualify for the required New York or Connecticut Safe Boating Certificate.

The one-day classes conform to the minimum required for State certification. The multi-day courses delve deeper into the material and include an introduction to navigation.
